

## **Emu Oil based Anti-Wrinkle Cream**

Anti-Wrinkle Cream is specially formulated for the sensitive and dry skin. A sophisticated formulation with a balanced variety of natural ingredients designed to nourish and prevent the skin from premature aging.

Anti-Wrinkle Cream provides:

### **Anti Wrinkle Actions**

Anti-Wrinkle Cream contains **retinyl palmitate** (Vitamin A) and **shea butter**. **Vitamin A/Retinol** has an anti-wrinkle action mainly by reducing collagen and elastin degradation. **Shea butter** is well known as a natural skin moisturiser that helps to prevent early aging and wrinkles.

### **Hydration**

During the aging process our skin cells lose their ability to hydrate. **Emu Oil** and **Glycerine** stimulate the hydration of the skin. This will keep the skin in a better condition and safeguards it from premature aging.

### **Anti-oxidants**

Anti-Wrinkle Cream is enriched with **Vitamin E**. Vitamin E is an anti-oxidant which protects the skin from free radicals.

### **Use Anti-Wrinkle Cream for**

- Firming and hydrating the skin
- UV protection

### **Usage**

- Apply on a clean face
- Suitable for daily use

Available in 50ml pump applicators within a printed carton

Aqua, Dromiceius, Cyclopentasiloxane, Glyceryl Stearate, Isohexadecane, Glycerin, Cetearyl Alcohol, PEG-8 Beeswax, Petrolatum, Butyrospermum Parkii, PEG-100 Stearate, Persea Gratissima, Stearic Acid, Phenoxyethanol, Glycerin Soya (Soybean Protein), Tocopheryl Acetate, Polyacrylamide, C13-14 Isoparaffin, Rosmarinus Officinalis (Rosemary) Oil, Methylparaben, Carbomer, Retinyl Palmitate, Laureth-7, Butylparaben, Ethylparaben, Sodium Hydroxide, Isobutylparaben, Propylparaben, Iodopropynyl Butylcarbamate

## **Emu Oil**

The Emu is a flightless bird from Australia. Since time immemorial Aboriginals used the fat from the emu to maintain their skin in optimum condition. From the fat we derive this extraordinary oil with highly valuable cosmetic and moisturising properties. Emu oil contains 70% unsaturated fatty acids of which 20% are essential fatty acids. The ratio of the fatty acids is unique; they are almost identical to the human skin
