

EMU OIL SKINCARE

acne cream - dry/normal skin

Acne vulgaris (common acne) is a frequently occurring skin disorder. Almost all adolescents suffer from it. This skin disorder is a chronically inflammation of the follicle of the sebaceous gland. Major causes are an increased production of sebum, bacteria or via so-called hyperkeratosis of drains of the hair follicle-sebaceous glands. This coincides with excessive production of keratine by the drain. This channel widens and the comedone is formed. The comedone can be closed (white head) or open (black head).

Emucare acne cream is composed of emu oil and chaulmoogra oil. These natural oils proved their activity already thousands of years ago and strengthen their activity at carefully selected concentrations of both ingredients.

Emu oil.

The Emu is a flightless bird, originated from Australia. Aboriginals used the fat of this bird thousands of years ago already, to maintain their skin and to protect it in the harsh desert climate.

Emu oil is an appreciated cosmetic ingredient. Scientific research proved that the oil does not clog the pores (non-comedogenic) and penetrates quickly through all skin layers.

The fatty acid composition of the emu oil is quite unique, it is almost identical to the human skin.

Chaulmoogra oil

This traditional ayurvedic oil, inhibits the growth of micro-organism, which exists in acidic environment and produces acids. For example *Lactobacillus acnes*. This organism produces lactic acid and is responsible for acne vulgaris. Chaulmoogra oil does not kill *L. acnes* but prevents this organism will multiply uncontrolled.

Application:

- For acne sensitive skin

Properties:

- Does not clog the pores
- Nourishes and protects the skin
- Stimulates connective tissue growth
- Balances skin flora
- Gives no shiny look

Ingredients (INCI):

Aqua, Butylene Glycol, Dromiceius, Glycerin, Ethylhexyl Stearate, Taraktogenos Kurzii, Cyclopentasiloxane, Aluminium Starch Octenyl Succinate, Dimethicone, Cetearyl Glucoside, Tocopheryl Acetate, Phenoxyethanol, Polyacrylamide, C13-14 Isoparaffin, Carbomer, Methylparaben, Cetearyl Alcohol, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Laureth-7, Sodium Hydroxide, Butylparaben, Ethylparaben, Methylidibromo Glutaronitrile, Isobutylparaben, Propylparaben.

Does not contain (synthetic) colouring agents and perfume.

Directions for use:

- Wash hands before applying the cream
- Cleaning the skin with toner or lotions is not necessary.
- Apply the cream 2-3 times each day.

This cream will not make the skin shiny.
Other cosmetics can be applied afterwards.

Please follow your physicians instructions for using your medicines.
