

## Moisturising & Firming Body Milk

Moisturizing and Firming Body Milk combines the pleasure of an agreeably-scented, light and velvety texture with the effectiveness of a genuine firming care which moisturises and revitalises thanks to an exclusive union of natural ingredients - extract of maté, extract of mango and apricot almond oil.

**It moisturizes:** apricot almond oil and glycerine combined for a skin which retains all its suppleness and softness. **It firms:** Sepilift, a triple-action firming agent, stimulates the collagenic fibres, improves the skin's elasticity and fights the formation of free radicals.

**It revitalises:** Extract of mango, which is rich in vitamins C, A and B, tones the skin and vitamin E, an anti-radical agent, acts against ageing.

**Results:** A more attractive body. **Firmer contours.** A moisturized, toned, firm, smooth and deliciously-perfumed skin.

Advice for use: Apply after showering and sunbathing to ensure that the skin remains moisturized.
